HOW TO CREATE AN INQUIRY

If you don't see the sizes you want in the product section of this catalog, please send us a request for quote using the coding system shown below to specify the size.

Please Note: 1) If any inquiry is received for a size combination for which exact tooling is not available, the next closest size will be quoted.

- 2) **D** and **H** dimensions remain metric irrespective of the studs being inch or metric.
- 3) For metric studs use letter **G** for thread size and letter **L** for length whereas for inch size studs, use letter **I** for thread size and letter **N** for length.
